Contents Volume 111

Paleomagnetic results from Upper Permian of the eastern Qiangtang Terrane of Tibet and their tectonic implications
K. Huang, N.D. Opdyke, X. Peng and J. Li 1
Remagnetization in southeast China and the collision and suturing of the Huanan and Yangtze blocks
J.P. Dobson and F. Heller 11
Multicomponent magnetization in paleomagnetic records of reversals from continental sediments in Bolivia
X. Quidelleur, J.-P. Valet and N. Thouveny 23
A geomagnetic excursion in the Brunhes epoch recorded in New Zealand basalts
H. Shibuya, J. Cassidy, I.E.M. Smith and T. Itaya 41
Different weathering stages indicated by the magnetization of limestones: An example from the southeast Pyrenees, Spain
P. Keller and A.U. Gehring 49
Osmium isotopic compositions from oceanic basalts
W.J. Pegram and C.-J. Allègre 59
Melt and fluid inclusions in basalts and xenoliths from Tahaa Island, Society Archipelago: evidence for a metasomatized upper mantle
P. Schiano, R. Clocchiatti and J.L. Joron 69
Orthopyroxene stability along the peridotite solidus and the origin of cratonic lithosphere beneath southern Africa
D. Canil 83
Cause of chemical zoning in the Bishop (California) and Bandelier (New Mexico) magma chambers
R.L. Hervig and N.W. Dunbar 97
Dyke complex of the East Pacific Rise exposed in the walls of Hess Deep and the structure of the upper oceanic crust
J. Francheteau, R. Armijo, J.L. Cheminee, R. Hekinian, P. Lonsdale and and N. Blum 109
Placing bounds on lithospheric deformation in the central Pacific Ocean
A.M. Goodwillie and B. Parsons 123
Physical characteristics of the Endeavour Ridge hydrothermal plume during July 1988
R.E. Thomson, J.R. Delaney, R.E. McDuff, D.R. Janecky and J.S. McClain 141
The trace metal composition of suspended particles in the oceanic water column near Bermuda
R.M. Sherrell and E.A. Boyle 155
Antarctic (Dome C) ice-core dust at 18 k.y. B.P.: Isotopic constraints on origins
F.E. Grousset, P.E. Biscaye, M. Revel, J.-R. Petit, K. Pye, S. Joussaume and J. Jouzel 175
Binary mixing of enriched and undegassed (primitive?) mantle components (He, Sr, Nd, Pb) in Samoan Lavas
K.A. Farley, J.H. Natland and H. Craig 183
Vertical distribution of dissolved organic carbon in the North Pacific as determined by the high-temperature catalytic oxidation method
E. Tanoue 201
Melting of the Fe-FeO and the Fe-FeS systems at high pressure: Constraints on core temperatures
R. Boehler 217
Partitioning of MgO, FeO, NiO, MnO and Cr_2O_3 between magnesian silicate perovskite and magnesiowüstite: implications for the origin of inclusions in diamond and the composition of the lower mantle
S.E. Kesson and J.D. Fitz Gerald 229
Element partitioning between silicate minerals and coexisting melts at pressures of 1–27 GPa, and implications for mantle evolution
R.D. Trønnes, D. Canil and K. Wei 241
High Th/U ratios in subcontinental lithospheric mantle: mass spectrometric measurement of Th isotopes in Gaussberg lamproites
R.W. Williams, K.D. Collerson, J.B. Gill and C. Deniel 257
Content and isotopic composition of sulphur in ultramafic xenoliths from central Asia
D.A. Ionov, J. Hoefs, K.H. Wedepohl and U. Wiechert 269
Isotopic and trace element constraints on mixing and melting models of marginal basin volcanism, Bransfield Strait, Antarctica
R.A. Keller, M.R. Fisk, W.M. White and K. Birkenmajer 287
Oxygen isotope exchange in a two-layer model of oceanic crust
D.P. Schrag, D.J. DePaolo and F.M. Richter 305

Porous sidewall and sloping floor crystallization experiments using a reactive mush: implications for the self-channelization of residual melts in cumulates
J.H. Bédard, R.C. Kerr and M.A. Hallworth 319
Boron depletion during progressive metamorphism: Implications for subduction processes
A.E. Moran, V.B. Sisson and W.P. Leeman 331
The high K_2O volcanism of northwestern Tibet: Geochemistry and tectonic implications
N.O. Arnaud, Ph. Vidal, P. Tapponnier, Ph. Matte and W.M. Deng 351
Astronomical solutions for paleoclimate studies over the last 3 million years
A. Berger and M.F. Loutre 369
The correlation of geomagnetic reversals and mean sea level in the last 150 m.y.
W. Marzocchi, F. Mulargia and P. Paruolo 383
A detailed chronology of the Australasian impact event, the Brunhes–Matuyama geomagnetic polarity reversal, and global climate change
D.A. Schneider, D.V. Kent and G.A. Mello 395
The marl–limestone rhythmites from the Lower Kimmeridgian (Platynota Zone) of the central Prebetic and their relationship with variations in orbital parameters
F. Olóriz, F.J. Rodríguez-Tovar, M. Chica-Olmo and E. Pardo 407
A 15,000 year paleoenvironmental record from Meiji Seamount, far northwestern Pacific
L.D. Keigwin, G.A. Jones and P.N. Froelich 425
Nitrogen isotope anomalies in primitive ordinary chondrites
N. Sugiura and K. Hashizume 441
Dynamic crystallization experiments on the Angra dos Reis achondritic meteorite
G.E. Lofgren and A.B. Lanier 455
The parent magma of the nakhlite meteorites: Clues from melt inclusions
R.P. Harvey and H.Y. McSween 467
^{10}Be chronometry of bedrock-to-soil conversion rates
M.C. Monaghan, J. McKean, W. Dietrich and J. Klein 483
Melting and mantle flow beneath a mid-ocean spreading center
M.J. Cordery and J.P. Morgan 493
Tectonic controls of metamorphic field gradients
L.J. Sonder and C.P. Chamberlain 517
Volatile and siderophile element geochemistry of the Moon: a reappraisal
A.E. Ringwood 537

Discussion

The Ce-Nd-Sr isotope systematics of seawater: Comment on "Isotopic compositions of Ce, Nd and Sr in ferromanganese nodules from the Pacific and Atlantic Oceans, the Baltic and Barents Seas and the Gulf of Bothnia", by H. Amakawa, J. Ingri, A. Masuda and H. Shimizu
H. Elderfield 557
Reply to comment by H. Elderfield on "Isotopic composition of Ce, Nd and Sr in ferromanganese nodules from the Pacific and Atlantic Oceans, the Baltic and Barents Seas, and the Gulf of Bothnia"
H. Amakawa, H. Shimizu and A. Masuda 563
